

PRODUCT DATA SHEET

W/B METALLIZED FILM PRIMER

1300-0910

GENERAL PROPERTIES	1300-0910 is a general applicable high gloss water-based coating. It is a well-balanced combination fast drying, very high gloss and good rub resistance. Excellent adhesion to other polyolefin, polycoated board, polymer coated films and foils.
APPLICATION	Used as a water-based primer and wash coats for foil, metallized films and other substrates. May be applied by flexo or gravure methods. It is applicable for food packaging products.

TECHNICAL INFORMATION AND HANDLING

SPECIFY GRAVITY	1.05 ? 0.02
% SOLIDS	42.3 ? 2.0
VISCOSITY	40 Sec Din Cup#4 @ 20°C
pH VALUE	8.0 – 8.3
RUB RESISTANCE	>150 rubs @ 50 g/cm ² (Prufbau)
HEAT-SEAL RESISTANCE	Up to 160°C against MS foil (1 sec. @ 40 psi)
